

WANTED

SIMULATIONS IN NEED OF A SURROGATE

GLOTTAL WAVES

the thesis, 1-D

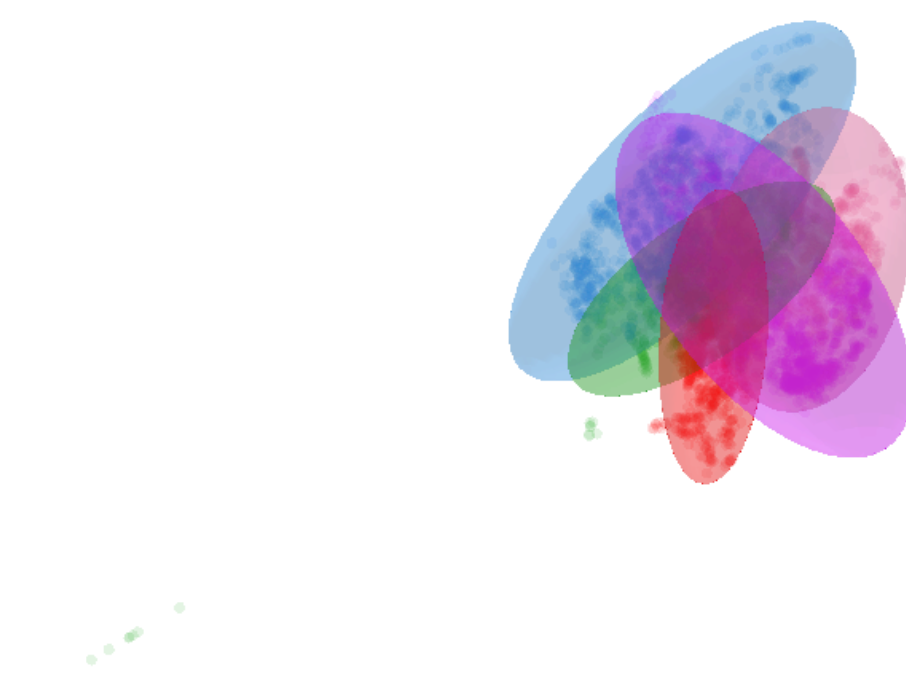

the data

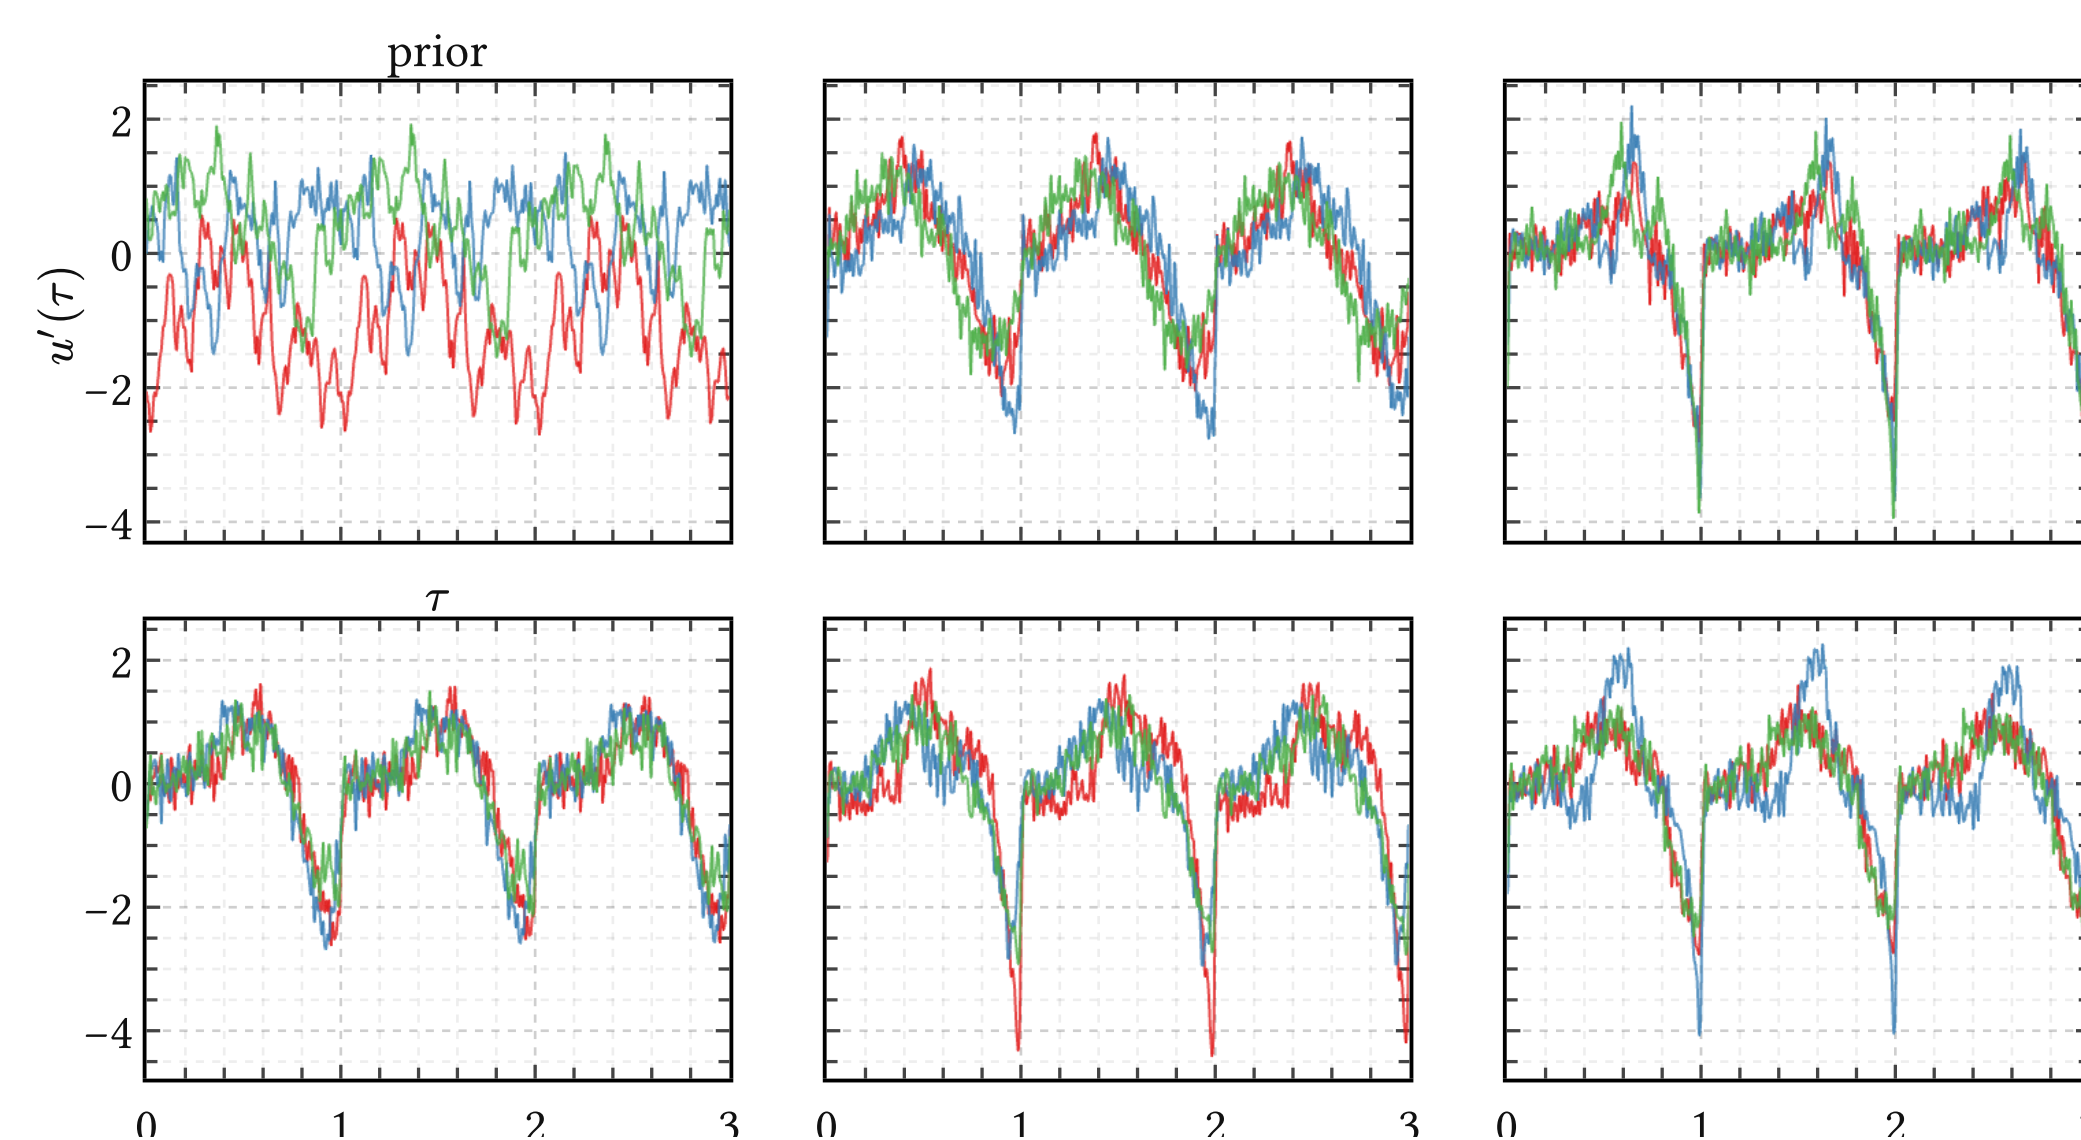

the latent space

the mixture model

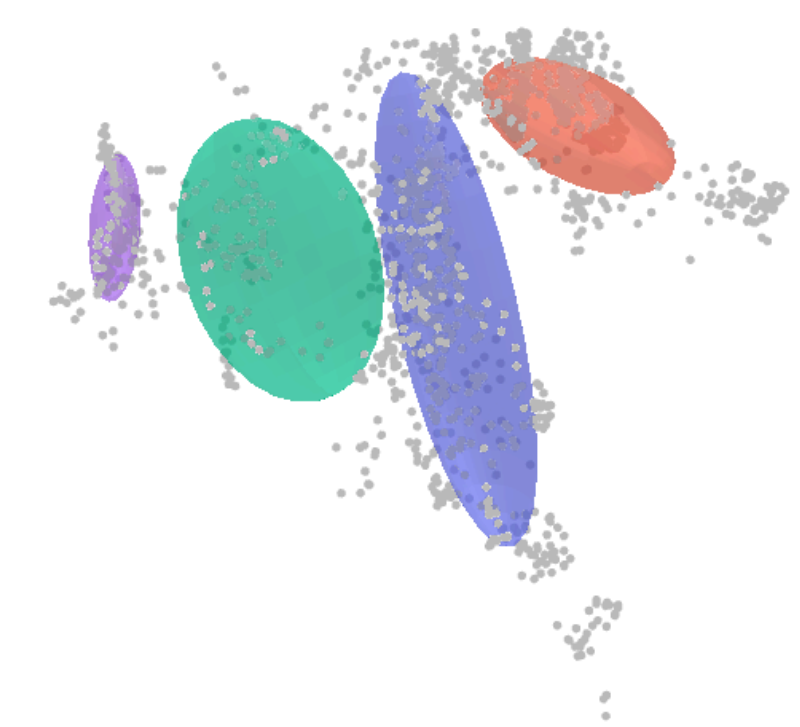

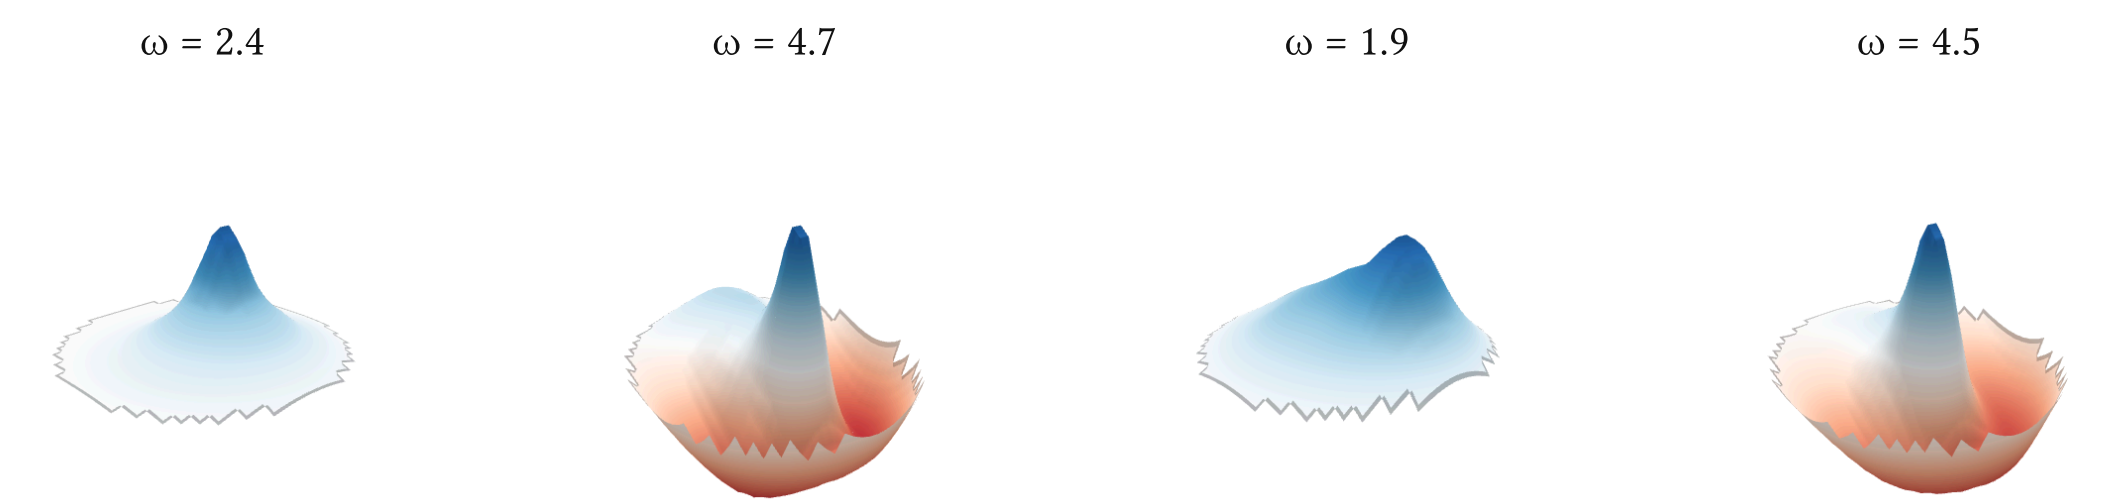

the archetypes (k)

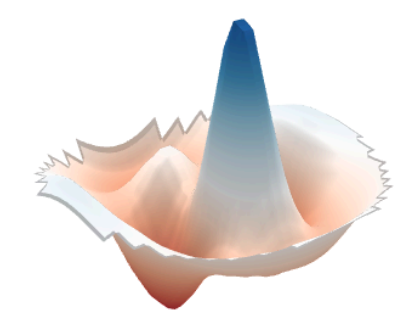

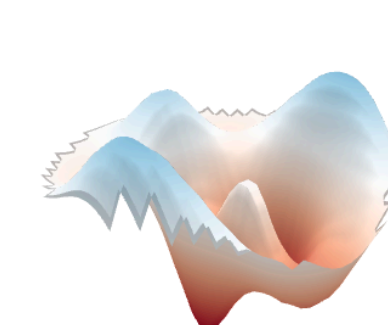

MEMBRANES

side quest, 2-D: same pipeline, untouched

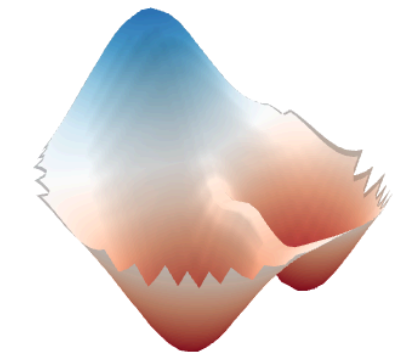

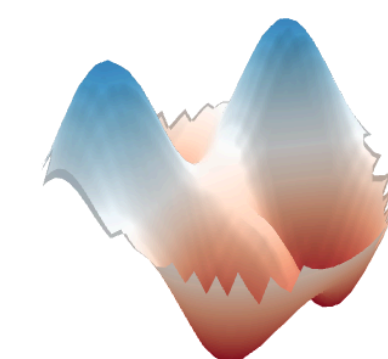

$k = 0, \pi = 0.41$

$k = 1, \pi = 0.34$

$k = 2, \pi = 0.13$

$k = 3, \pi = 0.12$

REWARD

a surrogate for *your* simulator: bring a parameter sweep, leave with a prior.
